LOOK
Pendant lamp

LOOK

Pendant lamp

LOOK is designed by Niklas Ytterström and is a fairly new addition to our design lamps. By combining an airy design with the energy saving capabilities of LED lighting this lamp is a welcome addition to any home.

The reflectors can be turned 360 degrees around each arm to reshape the whole appearance of the lamp. LOOK comes in four colors, silver, black, copper and wood.

"The concept around this lamp sprung from the inspiration of the changing of the four seasons. It reflects the feeling of each state of the year as it can be made to look like an autumn wind breezing through the room, crystallizing during winter and blossoming out from spring to summer."

The materials and colors combined with a sensible light source is true Scandinavian design."

FREDAG
Lamp series

FREDAG

Lamp series

FREDAG is one of our newest lamp series, designed by Industrial Designer Felix Lin. It has an exclusive wood shade and a clean design. The easy triangle wire legs gives it a lighter appearance and makes the placement of the table lamp easier. FREDAG can be placed at the bedside table, on the bookshelf or pretty much wherever you want. It is an added bonus to any type of interior, providing a cozy atmosphere.

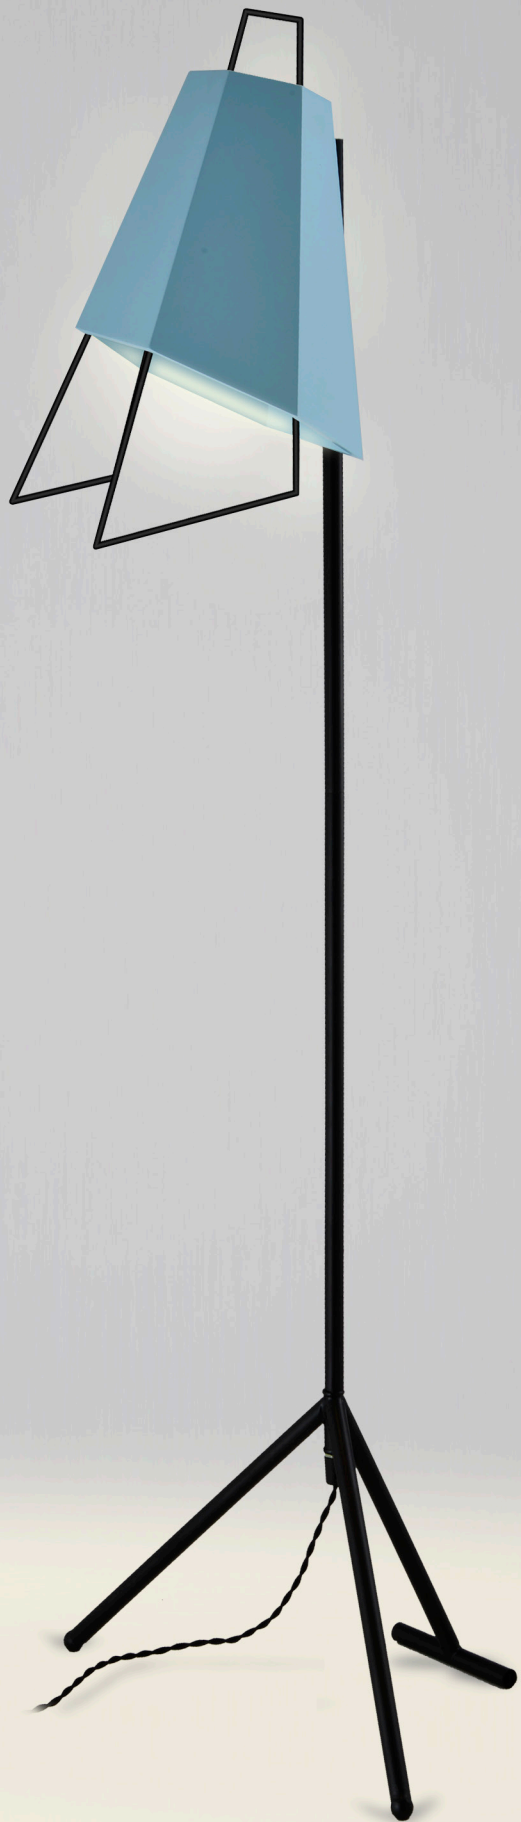

The design of FREDAG floor lamp takes inspiration from the Friday mood. The idea was to design a lamp with a smooth light form and with a simple and soft geometry. It is a fresh character with friendly, simple lines. The wood shade is available in different colors, pleasantly adapted to our daily lives.

Happy Friday ya'll. Our home is our happy place.

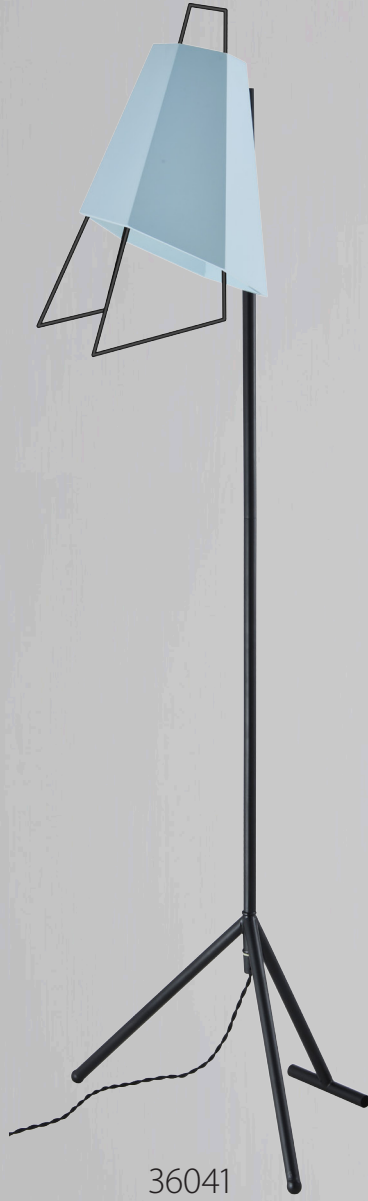

"To me design is a fresh air that can influence our life to make it better and happier. I love to interact with people and to understand their needs. It's a better way to learn, to see new opportunities and to discover good solutions."

"I look to design as a holistic issue which has a capability to create original ideas. It is also adapted with nature and environment. It is simple, beautiful, diverse and respectful towards human beings."

L
Wall lamp

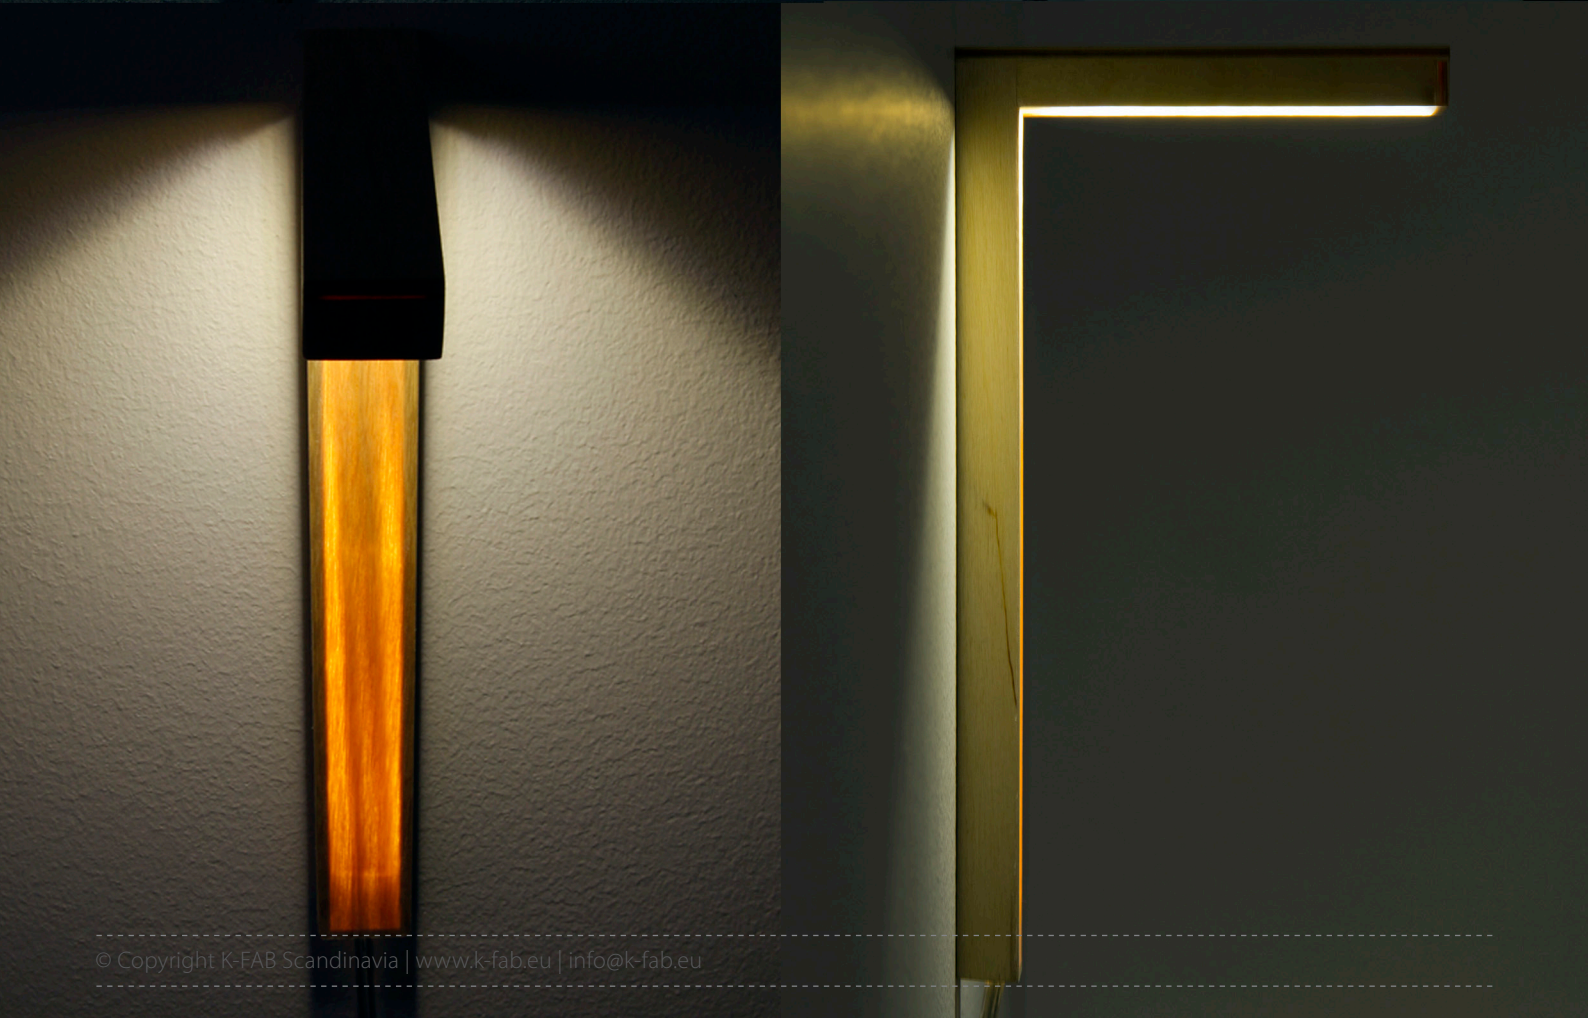

L Wall lamp

Award winning Swedish designer Kristina Gernes works in the field of furniture and lighting design and is specialized in Scandinavian wood design. In her latest pieces she explores the possibilities in the use of reclaimed materials as raw materials for manufacturing.

The lamp L is a wall lamp in Scandinavian minimalistic design. With its focus on sustainability it combines energy saving LED technology with waste materials from other wood manufacturing. The demand for more environmentally friendly products is growing rapidly, and L hits the core with its contemporary beauty. The cone of light creates graphic patterns on the wall, and the wooden veneer gives the eye a pleasant experience.

"L is designed and developed by Kristina Gernes."

LITTLE HELPER

Lamp series

LITTLE HELPER

Lamp series

This lamp series is designed by Gustav Rosén and is a new addition to our design lamps. LITTLE HELPER are graceful table and floor lamps that lean forward and rest on their triangular stands. Their shape is 1950's inspired yet with a modern feel with the combination of minimalistic design, rawness and new functionality.

Designed with the goal of merging a sculptural book rack and lamp, the object is reduced to only its necessary elements. The lamps bases are hidden inside of a spring at the end of the pole which holds a large bulb lamp. The lamps rest on their triangular stands that also is a magazine or book rack. LITTLE HELPER comes in three colors: white, black and mint green.

LITTLE HELPER comes in a family of lamps in two different sizes. LITTLE HELPER Table lamp is the smaller table version of the two while LITTLE HELPER Floor lamp is the larger.

"The notion around this series is to create a lamp with a retro-modern appeal and combining minimalistic design with new functionality."

GIRAFFE

Floor lamp

GIRAFFE

Floor lamp

This floor lamp, designed by Yicheng Li is developed specially for children. The long neck of the giraffe is a ruler, it can be used for measuring the kid's height. GIRAFFE is mostly made of wood, it is safe and environmentally friendly. GIRAFFE is also a cute friend in the children's room.

Yicheng Li is an Industrial Designer and Design for All specialist. He has years of experience in Product Design, Environmental Design and Graphic Design. Now he lives in Sweden and works as an independent designer.

"This design is inspired by a giraffe. I like to design for kids based on their needs. As a group with special needs, they deserve more than just a lamp. A giraffe is a trusted friend. It measures the kid's height and also grows up together with them."

MUSKÖ
Wall lamp

MUSKÖ

Wall lamp

This lamp is designed by Gustav Rosén and is a new addition to our design lamps. Beauty is hidden in simplicity. Beauty can also be hidden in asymmetry. With a sleek minimal design MUSKÖ combines simplicity and asymmetry, creating something that is both strikingly organic and minimalistic at the same time. It fits perfect next to the bed or in the modern style living room.

The frame is made out of oak or birch wood and the lamp shade is laser cut powder coated sheet metal. MUSKÖ comes with a textile-covered cord and a complete wall installation kit. The lamp shade is available in three colors; black, white and mint green. The lamp comes as a flat pack solution and the design guarantees for minimal waist of materials and use of resources. The materials and colors combined with a sensible light source is true Scandinavian design.

"This concept was born out of playing around with different ideas about asymmetry, wood as a material, a flat lampshade that the user could shape and a simple assembly and mounting device."

ILLUSION

Chandelier

ILLUSION

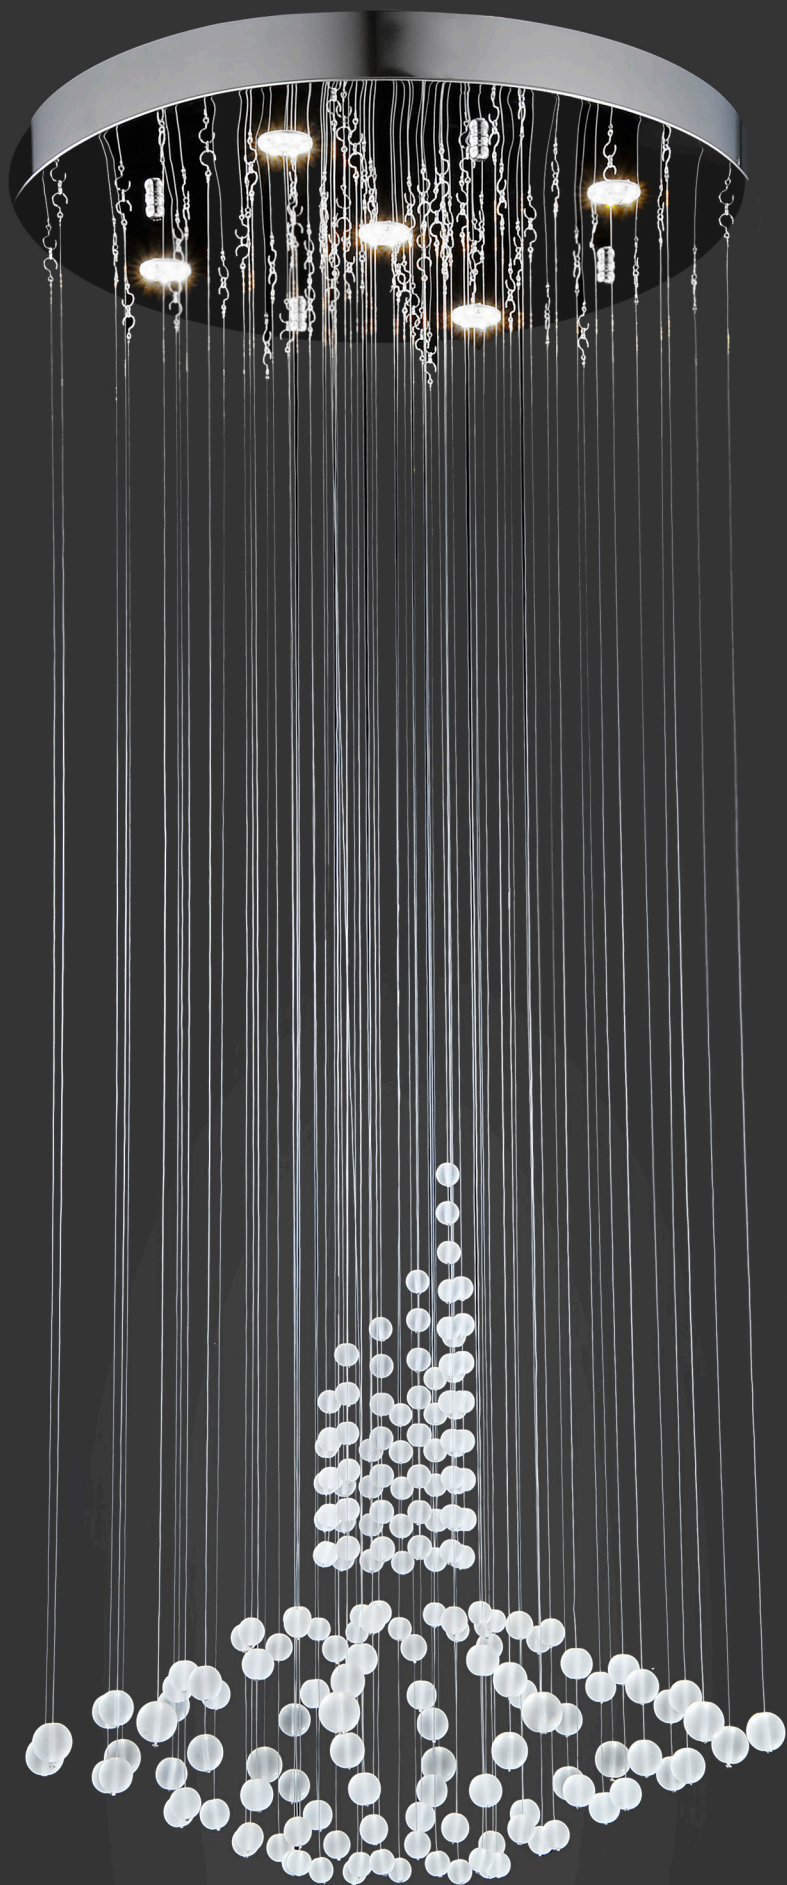

Chandelier

ILLUSION is designed by Industrial Designer Emil Thunfors and is one of K-FAB Scandinavia's first custom designed lamps. By excluding the normal framework but still keeping a shape associated with a chandelier, Emil created a transparent glowing object that seems to float in the air. The shape still shares some visual resemblance with the classical Baroque chandelier, while also triggering associations to falling snowflakes reflected by surrounding street lights.

Using LED technology and less material helps to ensure that the product will have a minimal impact on the environment.

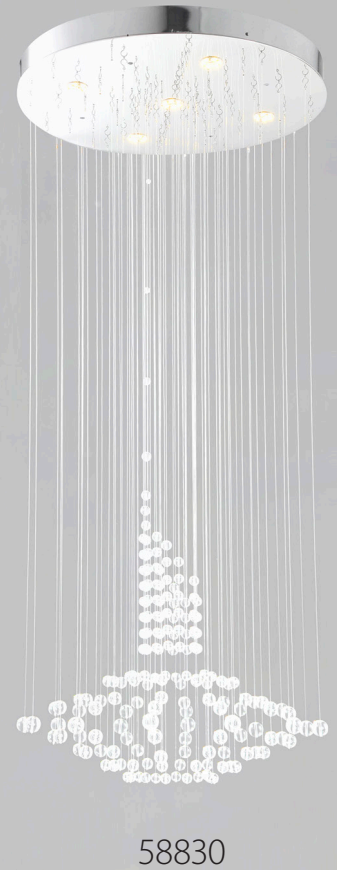

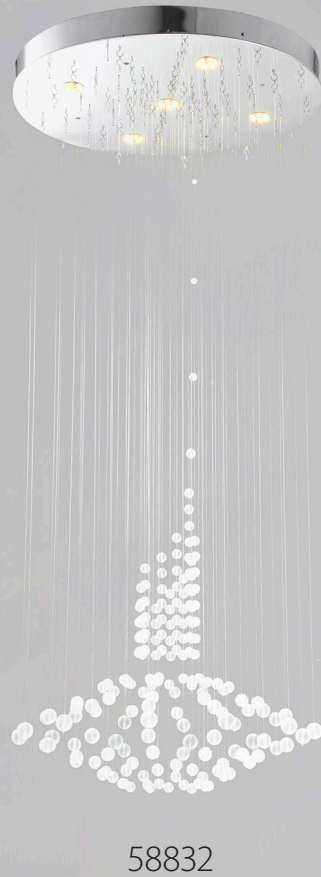

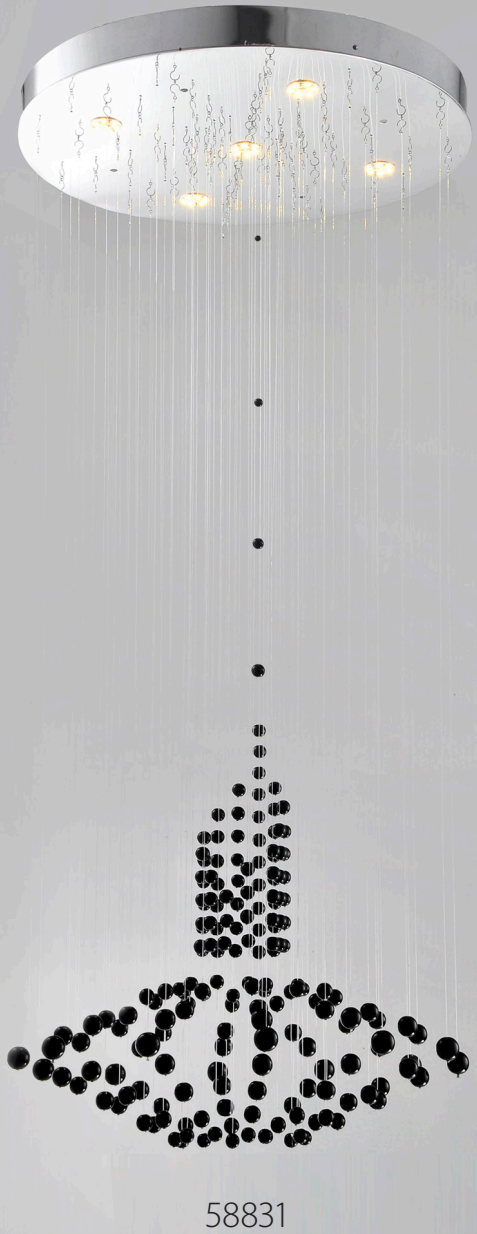

"I wanted to create something different with the Illusion series, something that questioned the fundamentals of what a chandelier is supposed to look like. I hope that this series will create joy, curiosity and interact with the beholder."
